

The background of the entire page is a complex, abstract marbled pattern. It features swirling, organic shapes in various shades of blue, from deep navy to bright cyan, set against a dark, almost black base. The pattern has a fluid, liquid quality, with some areas appearing more dense and others more wispy.

COMPANY PROFILE

About us

ENGLISH EDITION

ABOUT US

We invest in innovation and we use high-quality materials to create the best solutions for our customers, with the aim to be their preferred partner always exceeding their expectations.

With over 50 years of experience, CEME Group is able to meet the different needs and expectations of its clients. The Company constantly strives to deliver top quality, innovative fluid control solutions, never compromising on product safety.

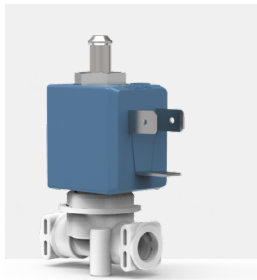

The Group is committed to constantly providing the highest performance, starting from the thorough selection of the best quality materials and suppliers, thanks to its extensive experience and expertise.

HOUSE OF BRANDS

The Trivolzio site, near the city of Milan, hosts the Group's **administrative headquarters** and the Company's **largest manufacturing facility**, equipped with high levels of cutting-edge automation.

In the Trivolzio plant are performed: the coil winding, the plastic injection processes and the testing of final products.

The plants in Colico (Lecco) and Cavenago (Monza-Brianza) are dedicated to assembling and testing of **bespoke solutions for our customers**.

Furthermore, the Tarquinia plant is dedicated to the **manufacturing of metal parts** supporting the other plants of the Group.

The Zhongshan plant is the reference production centre for the Asian market, covering the Group's client base in this area.

OUR APPROACH

Guaranteeing **sustainable growth and long-lasting value** to all customers.

Providing innovative solutions for a better and sustainable quality of life.

Innovation, responsibility and commitment are the keywords of our business approach focused primarily on our employees, customers and partners.

A WORLDWIDE PRESENCE

Our sales force is supported by a structure of partner distributors that provide global coverage for our CEME Group branded solenoid valves, pumps, pressure gauges and transducers and provide tailored customer service.

These highly skilled partners independently manage client portfolios and guarantee a widespread, expert organisation, which is completed by a logistics offering that provide customers with quality and prompt service.

FEATURES & NUMBERS

CEME Group employs over 2,000 people around the world, mainly located in Italy and China.

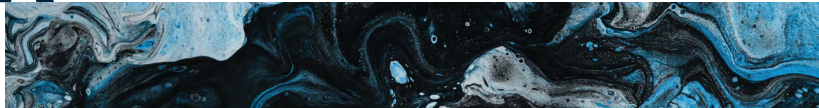

Furthermore, the Group's personnel is a well balanced mix between young and motivated workers and employees supported by an experienced management.

In the last years the Group has been experiencing a double-digit growth, closing 2024 with a turnover of €335 million.. This is the best demonstration of the undisputed market leadership and the success of our value proposition recognized by our customers.

The global presence and continuous expansion are distinctive traits of CEME Group's success. The constant diversification of the Group's product portfolio over the years has allowed it to reach a **record expansion** – both in terms of **geographical areas and applications**. CEME's is focusing into four main market segments.

The Group's success stems from a customer-oriented operating model, offering critical to function bespoke solutions that combine innovation and quality.

OUR GLOBAL MARKET

With its comprehensive product portfolio, CEME Group is able to meet the needs of its customers in various sectors.

The main reference area is **Food & Beverage**, which represents 52.8% of total sales. Following this are **Specialty Applications**, while the remaining sales are divided between the **coffee market**, with both domestic and professional coffee machines.

CERTIFICATIONS AND SUSTAINABILITY

OUR PROGRESS

CEME Group is dedicated to continuous progress and sustainability, which it sees as a core part of its daily operations and business strategy. The company has expanded its GHG emissions monitoring to new Scope 3 categories and is a participant in the UNGC, the world's largest corporate sustainability initiative.

To measure its commitment, CEME Group undergoes an annual EcoVadis assessment, the global standard for sustainability ratings. In February 2024, the company was awarded a silver medal, placing it in the top 15% of companies worldwide.

QUALITY ASSURANCE

For CEME Group, customer satisfaction and continuous improvement are essential. Quality has always been a key value, ensured by a system of constant control, a computerized network for product conformity, and complete traceability.

Our integrated management system, certified according to ISO 9001, ISO 14001, and ISO 45001 standards, is the foundation for the continuous improvement of our processes' effectiveness and efficiency.
